VERBAL DESCRIPTION:

Pendant fragment, top portion is vis. ble. Piece goes all the way through the piece & it is possible to see how piece goes through one side to the other - second side has a small clay buildup around it that has not been smoothed over very well. The top has not been flattened & ~~the~~ corners are not square. It looks like the piece was just made without flattening first. The side with the excess clay is bunt from top to bottom along the length. The other side is fine. No ^{tapering} tapering is visible, but this is hard to say since not all of the fragment is vis. ble. No paint, slip or decoration. Not drawn.
